

# MetaGrocer

Optimize your grocery shopping trip

Tim Adamson, Kevin Birrell, **Ryan Milem, Lulu Sun**

## Overall Problems

Local stores are often overlooked

Prices can change regularly, and sales may not always be honest

Price comparison between stores is time consuming

Shopping can take a lot of time

# Design Research

Methods, Participants, Takeaways

### Contextual Analysis

Watched participants shop at grocery stores

Observed their behaviors when picking items

### Interviews

Shopping preparation habits

1 Participant  
3 Field Researchers

# Design Research |

# Participants

Target Audience

College students

Young adults

Recruiting

Asked our college-aged friends

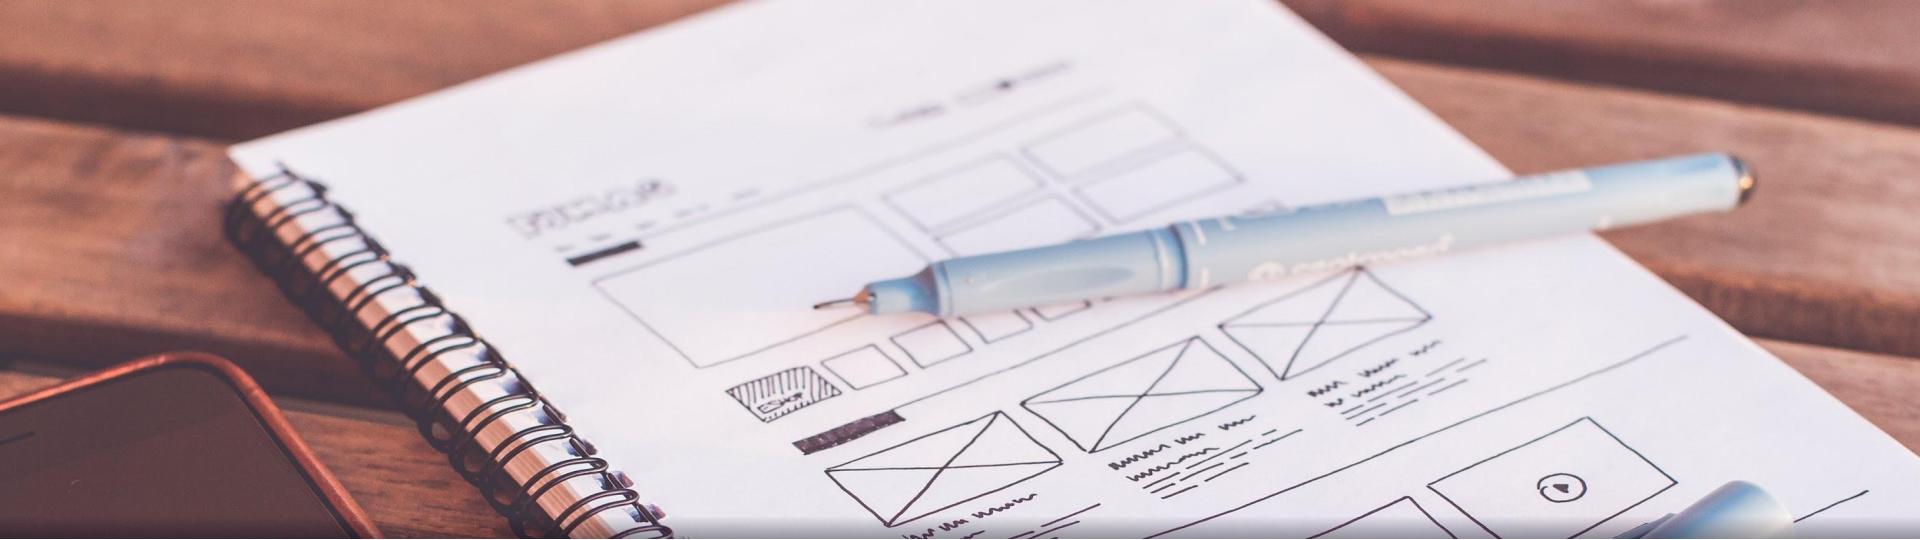

- Time vs. Money
- Large one-stop stores get the business
- Young people don't seem to prepare much
- Brand loyalty isn't a major factor

# 6 Tasks

1. Item price comparison between stores
2. Finding coupons for planned purchases
3. Sale price to usual price comparison
4. Fitting a shopping trip into a day's plans
5. Determining availability of desired items
6. Finding information about items

# 3 Design Sketches

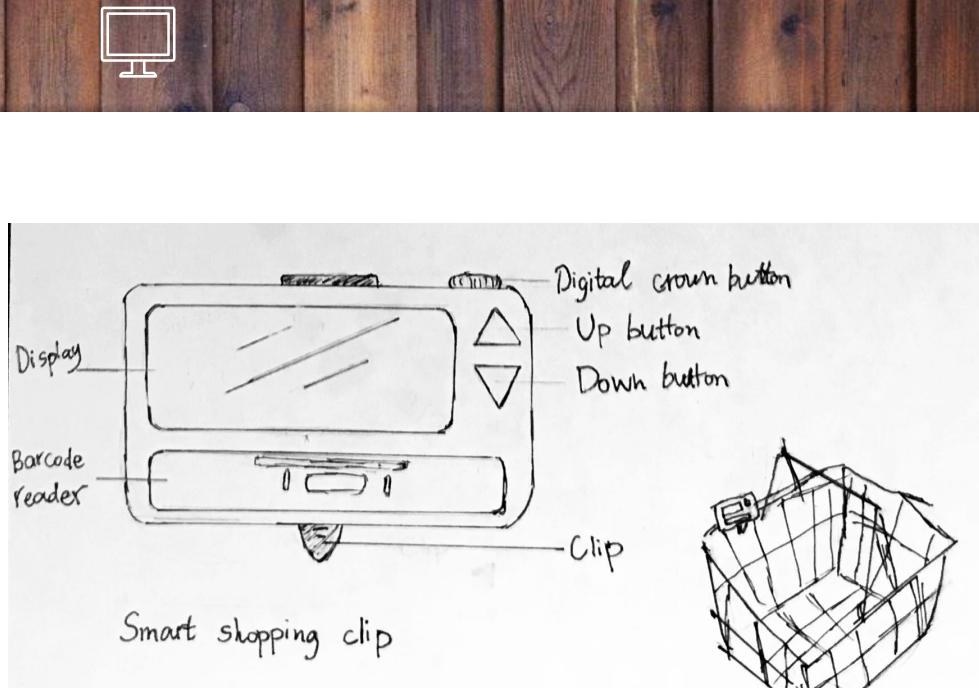

Smart Shopping Clip + Website, Money Saving App, Time Saving App

## 3 Design Sketches |

### Design 1: Smart Shopping Clip + Website

Users carry the smart shopping clip with them while shopping.

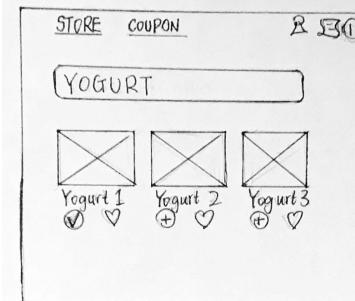

Users use the website to enter information.

### 3 Design Sketches |

### Design 1: Smart Shopping Clip + Website

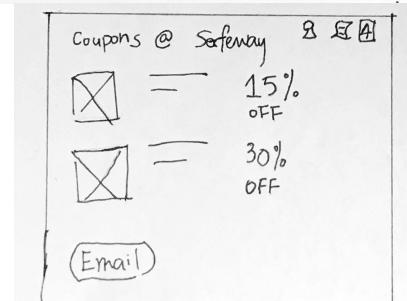

Looks for coupons for the items in the shopping lists.

Task 2. Input shopping list

Task 2. Store selection + find coupons

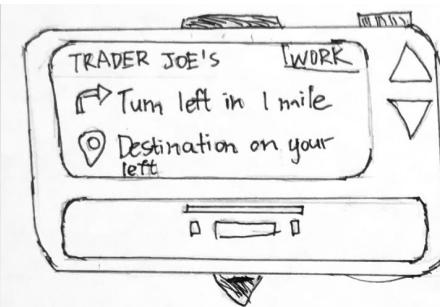

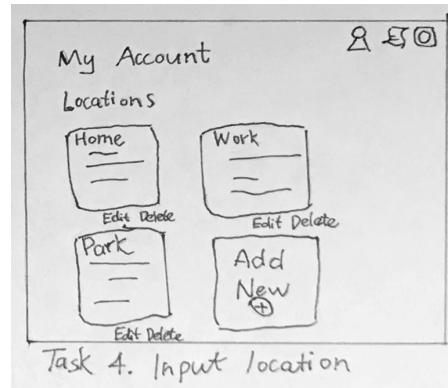

Task 2. Email coupons

## 3 Design Sketches |

## Design 1: Smart Shopping Clip + Website

Users can add destinations on the website.

Clip tells users which store is on their way to their destination.

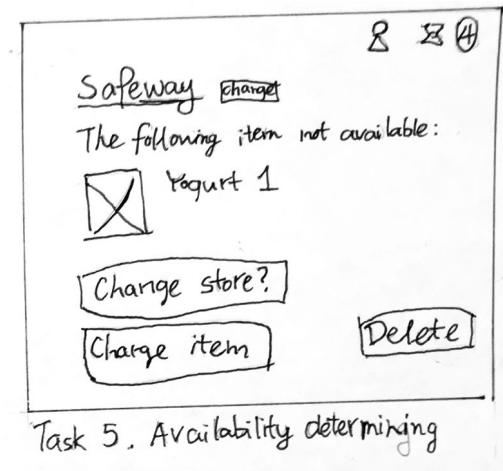

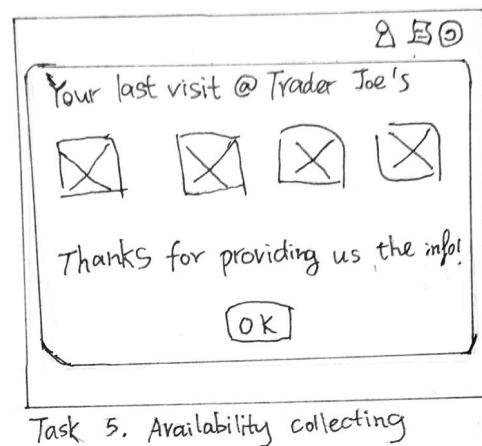

### 3 Design Sketches |

### Design 1: Smart Shopping Clip + Website

Users can provide item availability information.

Informs users what is available at which store.

### 3 Design Sketches |

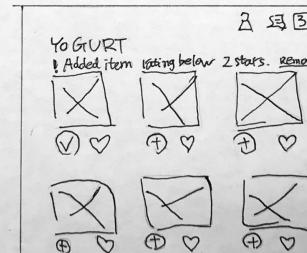

### Design 1: Smart Shopping Clip + Website

Warns users if the quality of an item is low, both in the clip and on the website.

Users can rate the items they have purchased on the website.

Task 6. warning in clip

Task 6. Warning on website

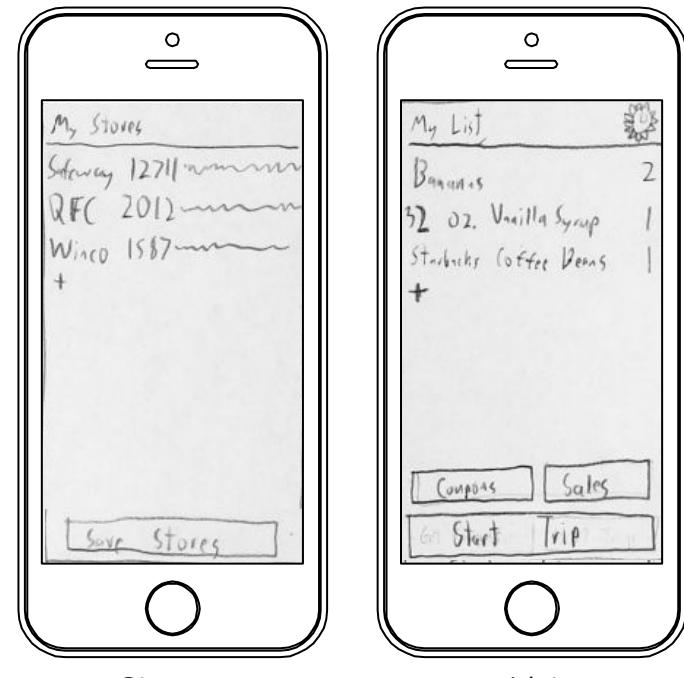

Task 6. Rate items

### 3 Design Sketches |

### Design 2: Money Saving App

Users are prompted to add stores they are willing to shop at. A grocery list is recorded, including item type and quantity.

Stores

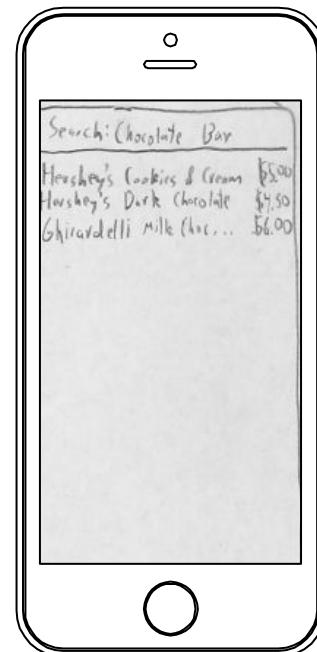

List

## 3 Design Sketches |

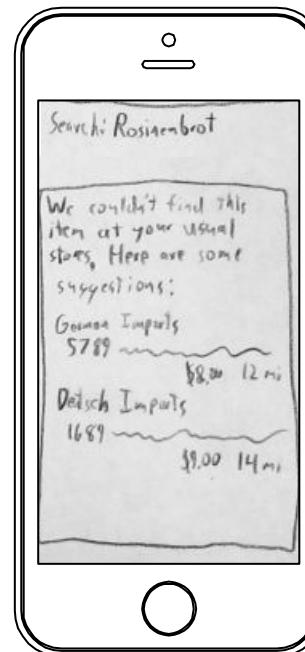

## Design 2: Money Saving App

A search function is used to add specific items to the list.

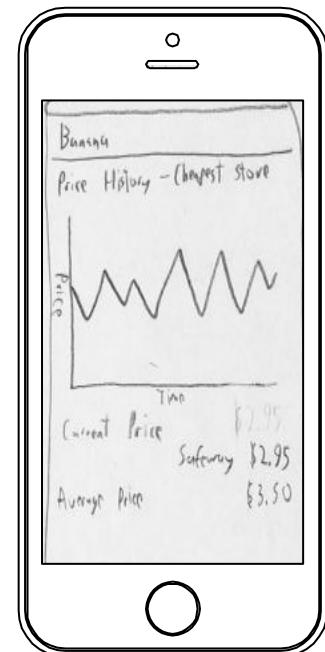

Selecting an item shows price history and statistics.

Searching Items

Unfindable Item

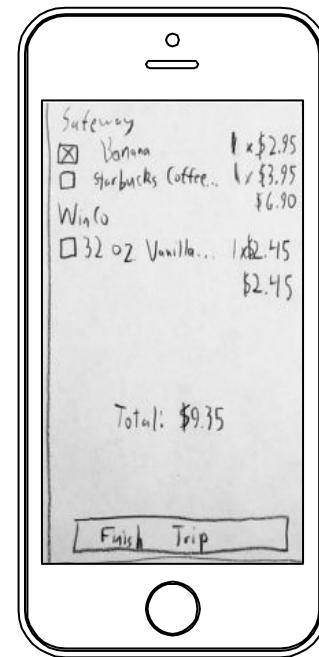

Item Stats

## 3 Design Sketches |

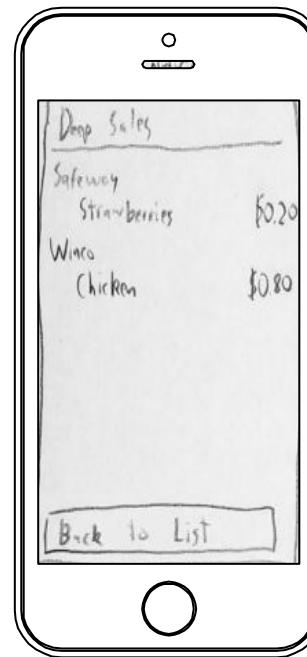

## Design 2: Money Saving App

During the trip, the list is divided by store and sales are displayed.

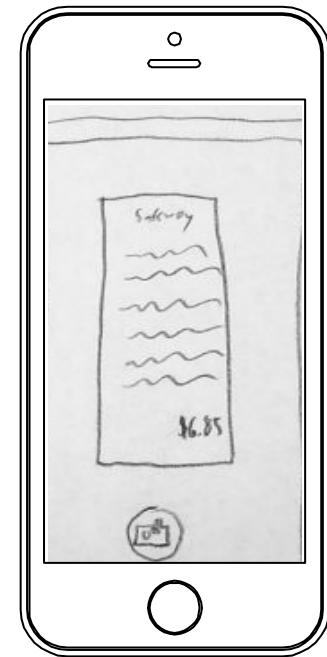

When the trip is finished, the receipt is scanned to update our data.

On the Trip

Sale Notifications

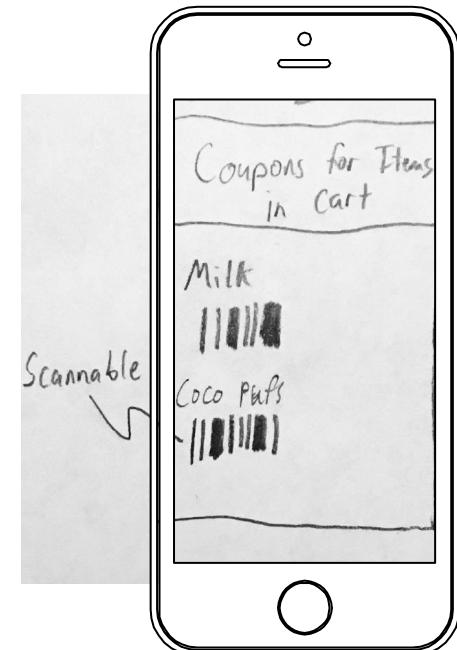

Receipt Scanning

Provides available coupons for items that have been scanned by the phone.

Allows users to scan the coupons at checkout to save.

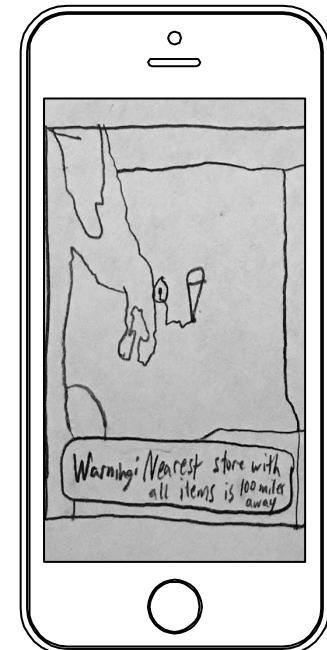

### 3 Design Sketches |

### Design 3: Time Saving App

Warns users if item is far away.

Provides location of desired item,  
and distance.

Availability

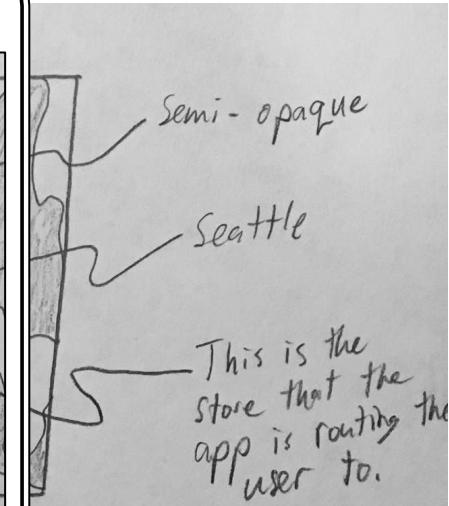

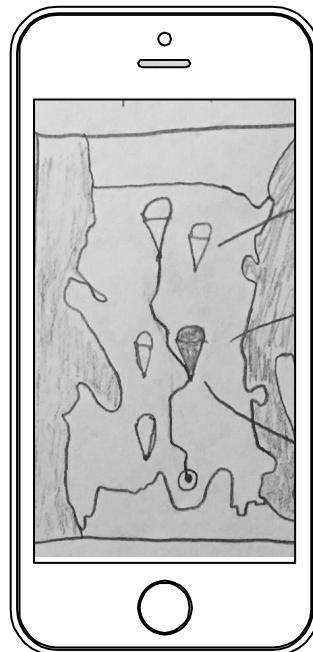

### 3 Design Sketches |

### Design 3: Time Saving App

Shows stores on the way with needed items.

Offers multiple options to choose from.

Plan Trips

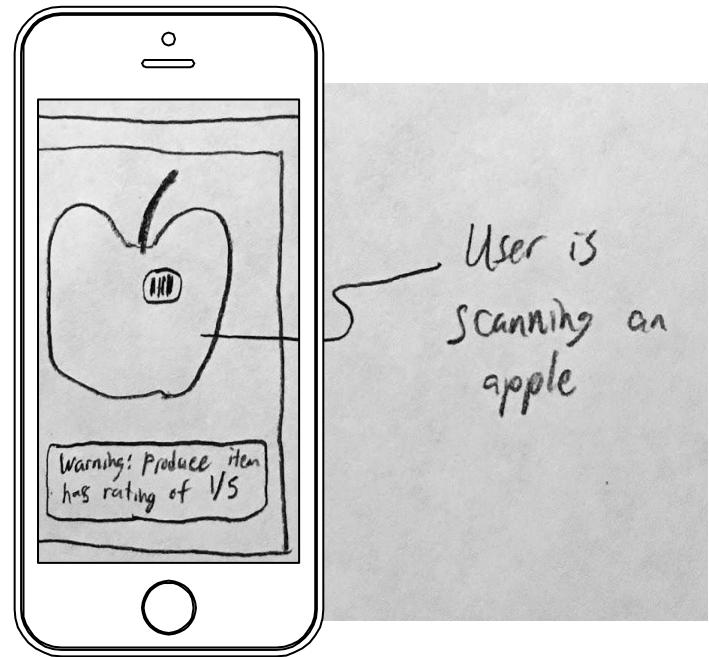

## 3 Design Sketches |

### Design 3: Time Saving App

Warns if item quality is rated poorly.

Presents instantaneous feedback.

# Selected Design

Storyboards, Tasks

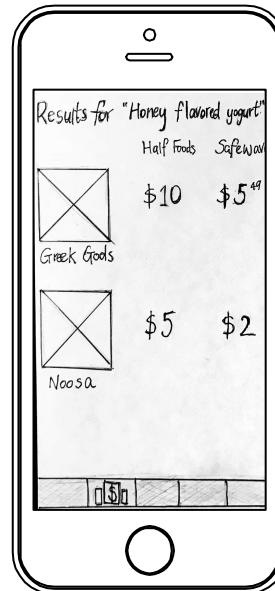

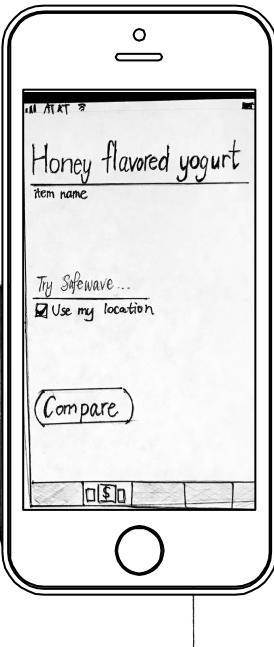

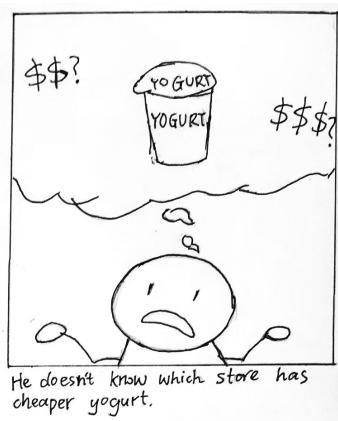

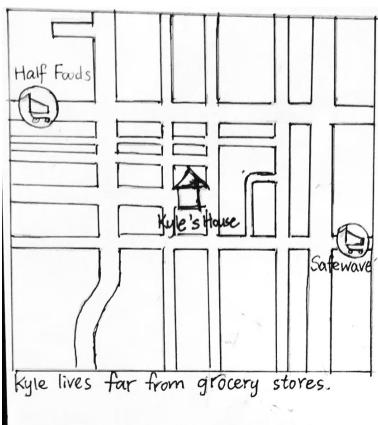

# Selected Design |

# Coupon Storyboard

# Selected Design |

# Price Comparison Storyboard

## Summary

- Price is the largest factor influencing which brand is bought
- Focus on saving money over saving time
- Include both pre-planned and spur of the moment ways to save money

# Thanks!
